

CMYK-Umsetzung von HKS-Farben

Mit Hilfe der Tabellen auf Seite 2 und 3 können Sie HKS-Farben nach CMYK umrechnen.

Bitte beachten Sie, dass diese Umrechnung immer nur eine Annäherung darstellt. Eine verbindliche Farbwiedergabe einer Sonderfarbe ist damit **nicht** möglich!

Sie finden deshalb in beiden Tabellen Pluszeichen, die Ihnen die Umsetzbarkeit verdeutlichen sollen.

HKS-Farben sind besonders brillante Sonderfarben. CMYK sind die Skalenfarben für die Druckproduktion und stehen für **C**yan, **M**agenta, **Y**ellow und **B**lack.

Bei Rückfragen zum Farbmanagement bzw. der Verwendung von Farbprofilen helfen Ihnen unsere Mitarbeiter gerne weiter.

HKS-K (für gestrichene Papiere)

gute Annäherung = + + +

weniger gute Annäherung = + +

schlechte Annäherung = +
